PROFESSIONAL SUMMARY

AI-focused B.Tech (Artificial Intelligence) student aspiring to be an AI Engineer, building AI-powered applications using Python, machine learning, and generative AI tools. Completed an IBM virtual AI internship and built projects in cyber threat detection and student performance prediction. Eager to grow in machine learning, deep learning, and Agentic AI to build intelligent, productivity-driven solutions.

EDUCATION

Bachelor of Technology in Artificial Intelligence <i>SR Institute of Management and Technology, Lucknow</i>	2023 – 2027
Intermediate <i>Anandi Devi SVM Inter College, Sitapur</i>	2021 – 2023

TECHNICAL SKILLS

- **Domains:** Artificial Intelligence, Machine Learning, Deep Learning, Data Analytics, Generative AI, Prompt Engineering
- **Programming & Web:** Python, C, HTML, CSS
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, XGBoost, Streamlit
- **Tools & Platforms:** Google Colab, GitHub, Google Antigravity, Codex, Emergent, NotebookLM, ChatGPT

INTERNSHIP

Artificial Intelligence Virtual Internship (PBELAI331IN) <i>IBM CEP via FSP IBM Developer Skills Network</i>	21 Jul 2026 – 23 Sep 2026
--	---------------------------

- Completed a 9-week virtual AI internship through hands-on learning modules covering core AI concepts and real-world applications.

PROJECTS

Cyber Threat Finder – AI-Based Network Threat Detection
Python, Google Colab, Scikit-learn, XGBoost

- Developed a machine learning system to detect cyber threats and malicious activity in network traffic using the UNSW-NB15 dataset.
- Trained and compared Logistic Regression, Decision Tree, Random Forest, and XGBoost; the best model achieved ~91% accuracy and ~97% recall on attack detection.

Student Performance Prediction System
Python, Machine Learning, Streamlit

- Built a model that predicts student academic performance using data preprocessing and model evaluation.
- Deployed it as an interactive Streamlit web application for real-time predictions.

Face-Based Attendance Monitoring System

- Built an automated system that identifies individuals and records attendance in real time, reducing manual work and ensuring accurate records.

Daily Ease Website

- Developed a user-friendly website with a clean interface that simplifies daily tasks and improves accessibility.

CERTIFICATIONS

- Generative AI Mastery Workshop – NxtWave
- Generative AI: Introduction and Applications – IBM

ACHIEVEMENTS

- Organized a prompt writing event on Engineers' Day at college
- Participated in the ISRO and Hack2Skill joint hackathon
- Attended AI Summit 2026

INTERESTS

Coding • Prompt Writing • Exploring Tech Innovations
